SUBSTANCE OF INTERVIEW

On June 7, 2006, Applicants' representative, Ronald Schoenbaum, conducted a telephone interview with Examiner McAllister to discuss the outstanding Office Action. During the interview, Mr. Schoenbaum proposed amendments to Claim 45, and explained how the proposed amended claim is distinct from Third Voice, RUSure, and U.S. Patent No. 6,405,175 to Ng. Examiner McAllister suggested that Applicants further amend Claim 45 to indicate that the option to view the previously-submitted product-related information is provided independently of whether the second user has selected the product. Mr. McAllister indicated that the addition of such language would be sufficient to remove RUSure as a relied-upon reference. No other claims or references were discussed, and no agreement was reached.
